Vitor Machado

Full Stack Developer

EXPERIENCE

Full Stack Developer
Inflight IT (Curricular Internship)
Fev 2023 - Jun 2023

> I developed custom ERPs using React for companies, employing a comprehensive architecture with modules for various areas, including user management, fleet management, inventory, etc.
> I designed and developed APIs using NestJs, GraphQl, and MongoDb to meet the needs of web applications, ensuring efficient data communication between front-end and back-end systems.
> I collaborated with the UI and UX team to translate mock-ups into engaging web experiences.

Laboratório e Quimica
S. Roque - Máquinas e Tecnologia Laser
Nov 2019 - Nov 2021

> Maintenance and recovery of digital print heads;
> Quality control testing of print heads;
> Analysis and approval of print head quality test results;
> Recording the start and end of tasks at the computer level;
> Creation of customer reports.

EDUCATION

Bachelor's degree in Computer Systems Engineering
Instituto Politécnico do Cávado e do Ave (IPCA)
Sep 2020 - Sep 2023

> I developed a mobile application where I simulated an online school bar. Where it would manage the product stock, manage the orders status, the hour the client would define to pick up the order, etc.
The project was made in Kotlin, C# (.Net) and MongoDb. The project got 19/20.

> I developed an web application where you could add the legal proceedings to the digital format. The project was made with the help of a lawyer so the project could follow the rules of the legal proceedings.
The project was made in Angular (Framework), C# (.Net) and PostgresSQL. The project got 18/20.
